Re:- pAr lead free products

This is being sent to confirm that Parlock covercoat products within the PC series have been formulated with fillers/pigments which do not contain lead.

Our product information bulletins do not list these products as leadfree because even though we do not use lead pigments/fillers there maybe some impurity as PPM within a raw material or maybe the mixing vessel was not perfectly cleaned leaving trace amounts.

The primer PM05 and PC16, PC 17 do not contain lead.

Should you require anything further, please do not hesitate to ask.

Regards,

Bernard F. Hogan
